

EMS Implementation

Overview:

This course is designed to provide a step-by-step guide to the implementation of an EMS and therefore provides practical training in this area. This course includes references to management standards such as ISO 14001:2015 and EMAS but also includes references to other relevant standards such as BS 8555. The course aims to give learners the skills to design and implement an EMS within their own organisation's existing management structure, rather than provide a ready-made EMS which doesn't necessarily address the organisation's specific issues.

WHO IS IT FOR?

Anyone whose job role requires them to have a practical understanding and ability to implement an EMS.

KEY FEATURES:

- Equips you with the knowledge and skills to implement an EMS
 - Available as an 'in-house' or 'open' course
 - Can be tailored to individual organisations' needs
 - Course structured around practical EMS exercises and problem solving activities to gain a 'hands on' perspective on the design and implementation of an EMS
-
